

## Refer Cats to Our Clinical Study for Atopic Skin Syndrome

We are looking for cats to enroll in a clinical study focused on feline atopic skin syndrome. There are currently two potential studies at our clinic for cats with this condition. There is an observational clinical study investigating the symptoms and progression of atopic skin syndrome as well as a study investigating a potential therapy for this frustrating disease. There are different requirements for each study and based on these requirements, we will work with owners to determine which study would be appropriate for their cat. Enrollment begins now!

Cats must have been previously diagnosed with or be experiencing symptoms of atopic skin syndrome to be considered eligible for one or both of the trials. All costs related to the study will be offered at no cost to the owner, including physical exams and labwork.

To get in touch or refer a case, feel free to reply to this email or give us a call at 702-243-1885. Visit this info page to learn more about eligibility requirements: <https://pages.clinicalstudiesforpets.com/feline-atopic-skin-syndrome-ot>

We look forward to working together with you to advance veterinary medicine!
