

We Are Running a Clinical Study to Investigate a Potential New Treatment for Scabies (Sarcoptic Mange) in Dogs!

Together with dedicated veterinary clinics across the country, we are running a clinical study to investigate a new treatment for scabies (sarcoptic mange) in dogs!

We are looking for **dogs** to enroll in our clinical study investigating a potential new scabies (**sarcoptic mange**) treatment! Enrollment begins in January.

The study has **3-4** mandatory clinic visits. To be eligible for enrollment the dog must be **experiencing symptoms of scabies (sarcoptic mange) and have evidence of infestation**, as well as additional study requirements. Symptoms include **excessive itching, scabs or bumps, or hair loss**. All costs related to the study will be offered at no cost to you, including exams, and the assigned study treatment.

To get in touch or refer a case, give us a call at 702-243-1885.

Visit this information page to learn more about eligibility requirements:
